MAMMOTH RHIZOME

(Actual Size)

TALL BEARDED IRIS

***Grown on Robert Wayman's Iris Ranch
in the Yakima Valley, Washington State***

I grow on my Ranch in the fertile and salubrious Yakima Valley what I believe to be the finest and largest rhizomes in the world. Many varieties produce rhizomes fully as large as the illustration.

My Yakima Valley rhizomes have the vigor and sturdy growth to withstand the coldest and most unfavorable climatic conditions to which they may be subjected.

North, South, East, or West, you will get better results from Wayman's Yakima Valley stock, grown in Washington's most fertile soil, for stronger plants, faster increase, and more abundant flowers the first year.

And with all these improvements and benefits, our prices are lower than before!

Robert
Wayman'sMASTERPIECE HONOR ROLL
of the Most Superb Varieties of Tall Bearded Iris

AS Connoisseur, Collector, and Propagator of the World's Masterpieces of Tall Bearded Iris, I present this Honor Roll of 59 Exquisite Selections, from my Washington State Iris Ranch, in the fertile Yakima Valley, whose golden apples and jeweled flowers rival the lavish bounty of the Garden of the Hesperides.

"Masterpiece" is a proud title of artistic distinction. But Leonardo's masterpiece, the "Mona Lisa", cannot be reproduced in its original glory by copyist or printer. Neither sculptor nor artisan can duplicate Cellini's statue of Perseus. Floral Masterpieces, however—the Tall Bearded Iris Masterpieces, in which I have cheerfully invested a fortune, are most gloriously reproduced in all their grandeur, by the rich soil and gracious climate at my Yakima Valley Ranch. My Mammoth Rhizomes, grown and developed there, give more abundant growth, and more flowers the first year; and they are hardened by the crisp cold winters of the Yakima Valley to withstand the most rigorous climatic trials in other latitudes.
